## RES at a glance

Since our last newsletter in 2006 the RES Group has expanded into new areas within the fire protection and Electro Mechanical market. The growing success of these changes has meant taking on several new engineers and dedicated servicing and maintenance vehicles to meet the demands of new legislation and our client requirements.

October 2006 saw the start of the Regulatory Reform (Fire Safety) Order 2005. RES has taken every step to guarantee our customers are fully covered by ensuring engineers spearheaded by Stephen Flint are fully trained and qualified to meet the latest and upcoming standards.

Whilst the emphasis on the last few years has been placed on the new RRF50, the RES Group has continued to build on its excellent customer service reputation and this has been reaffirmed by our BSI Quality Management System incorporating RES Systems and RES Electro as of March 2008.

Following the success of RES Systems, RES Electro has proved to be a much demanded and integral addition to the group giving clients an entire service for every requirement. RES prides itself on being ahead and basically aiming to make complying to British Standards as straightforward as possible for all of our customers varied needs whilst minimising cost.

## Signage

We now have a dedicated safety signage engineer Johnny Adey who can advise, supply and install all types of signage that can be customised and adapted to client requirements, from safety and warning signs to large escape route procedures - all your signage needs are covered by us. **Please call 0800 731 0727 for your free site survey.**

**New Electrical Regulations in Force July 1st 2008**

The 17th Edition is a combination of Regulations & requirements taken from across the EU.

- > No need to panic & don't be tricked into work you don't require.
- > If you need any help, advise or information please do not hesitate to contact one of our team

## RES Electro

Providing a service tailored to meet your requirements.

Hello and welcome from Brian, Ben and Stephen of RES Electro Limited. A new direction for RES from 2006 to 2008 the company has continued to grow from strength to strength and this year we aim to increase the workforce due to client demand.

With the recent successful inspection of the NICEIC as the Electrical Governing body and the rapid approach of the new 17th edition Electrical Regulations we are here to offer you the advice and the skills needed to undertake what is required to comply.

We at RES Electro are able to provide a service tailored to meet your requirements. Our aim is to always say "yes we CAN help"

**M&E Building Services, Electrical Installation, Fault Finding, Electrical Testing and Inspection, Portable Appliance Testing, Fire Protection Engineers, HVAC, Risk Assessments**

# RES Systems get ready

RES Systems Limited are busy preparing for one of the most prestigious third party certification schemes in the business.

The BAFE SP203 Kitemark Scheme for fire safety services is highly recommended by the RRFSO and also by an increasing number of major insurers and Fire Officers which is aimed at reducing false alarms and improving standards within the industry. Don't forget that we offer FREE site surveys and a 24 hour seven day a week call out service.

## RRFSO 2005

Remember a **Fire Risk Assessment** is the most important obligation for all businesses to conduct and then review on an annual basis, not forgetting regular maintenance of your Fire Protection Systems.

**Please call 0800 731 0727 for advice and guidance.**

**Reading Extinguisher Services** is now in its 23rd year of business and 2008 brings us a new addition to the team, Johnny Adey is our dedicated safety fire signage engineer to provide a comprehensive service to all of our customers.

Stephen Flint has also undergone intense training gaining a number of qualifications ensuring that he himself as head of RES is constantly improving and encouraging clients and staff alike to continue to reach their goals.

As a BSI and BAFE Registered Technicians Company, all extinguisher servicing and maintenance works are carried out to the highest standard and together with our equipment location lists and advisory service to current British Standards, we continue to offer you a premium service at a competitive price.

We take on responsibility for your portable fire protection equipment on site or residential properties giving you peace of mind and total Fire Protection. We offer 3 types of STAFF TRAINING whether it be a Demonstration, "Hands On" or full Fire Marshal Training it can be tailored to your specific requirements. RES aims to maintain a qualified professional service with our fully certified team bringing total customer satisfaction.

## Meet the team :)

### Our Extinguisher Engineers;

Damian Lynch, John Day, Chris Dormer, the return of Oliver Selvey and Johnny Adey make up this qualified team. All of our engineers are now CSCS registered and BAFE Registered Technicians.

### Our Alarm Engineers:
